How to Sew a Christmas Bauble

5. Top and bottom segments are now sewn together. Next stage a short way up from the bottom over sew at one point the segment together. Do this all the way round. Repeat this sewing of segments at the top of the bauble as well.

6. Take the centre point of one segment and over sew it to the next segment so the contrasting fabric becomes visible. repeat this all the way round. Your bauble is complete.

3. Iron each circle in half.

4. Sew the segment centre point together. Add another segment sewing the centre point together and sewing it onto the first segment. Continue to add segments until all pieces are attached. Before joining the last segment to the first segment sew in a ribbon. Repeat as above sewing the bottom segment centre points together.

1. Place two pieces of fabric with right sides together. Draw nine circles. Machine around the line of each circle, remember to leave a gap ready turn right sides out.

2. Cut each circle out and snip the edges. Turn each circle the right sides out. Iron the circles, remembering to tuck the gap edges neatly inside. You can hand stitch the gap closed or machine edge each circle.
